Professional Summary

Experienced technical professional with an array of skill sets including but not limited to sales, cybersecurity, full stack development and geospatial intelligence analysis. Proven ability to increase efficiency, and reduce employee burden in order to maximize profits. Expertise in data analysis, report generation, developing hardware and software based solutions.

Professional Experience

WebMall

📅 Mar - Nov 2020   📍 Los Angeles, California

Full Stack Developer

- Designed and developed order/invoice features with role guards for user and vendor functionality.
- ReactJS, NodeJS and MSSQL were used to create a REST API service which was tested with POSTMAN pre-deployment.
- Media queries were used to ensure responsiveness of the web application for mobile devices.
- Client side routing was implemented using React Router to achieve the single page application look and feel.
- Data validation was ensured using Formik, Yup and Joi.
- The team worked together in an agile environment and peer code reviews were performed before submitting changes to the repository using Git.

American Income

📅 Jan - May 2020   📍 Las Vegas, Nevada

Benefits Advisor

- Provided existing clients with policy reviews and recommendations to further extend their coverage.
- Performed prospecting by placing outbound calls and met with potential clients in order to convert them into customers after analyzing their personal situation and providing them with relevant information to make well founded decisions.
- Provided clients with additional benefits by giving recommendations for supplemental plans that complemented their current insurance plans.
- Contacted and re-enrolled previous clientele to ensure their families were protected in the event of an emergency or death.

U.S. Army

📅 Mar 2016 - Dec 2019   📍 U.S. and South Korea

Imagery Analyst

- Created hundreds of intelligence reports and graphics in support of deployed units within three COCOMs which led to the disruption of enemy efforts in the AOR.
- Developed training materials which were utilized by incoming personnel, reducing the time spent learning new software and procedures.
- Created templates for various analyst tasks which reduced the time spent for the life-cycle of product creation.
- Resolved network and software issues within Windows, RHEL7, as well as those involving antenna/radio devices.
- Produced a quantitative and qualitative report for a pilot program, the results of which were used to alter data collection procedures by key decision makers to further improve the functionality of AI.

Skills

Front End
- HTML, CSS / SCSS, JavaScript, React, Data Validation, jQuery, Bootstrap

Middle Tier
- NodeJS, ExpressJS, Data Validation, Mongoose, JWT, BCRYPT

Back End
- SQL (MSSQL and MySQL), Document Based Databases (FireBase and MongoDB Atlas)

Education

IBM Cybersecurity Fundamentals
📅 Dec 2020

CompTIA Security+
📅 Jul 2019 - Jul 2022

NGA Fundamentals of MTI Exploitation
📅 Mar 2019

NGA GEOINT Professional Certification
📅 Mar 2018

MSET Geospatial Technician
📅 Apr 2015

Awards

- 2x Army Achievement Medals
- Army Commendation Medal
